

Enhance your skills, methodology and safety performance

BD Medication Data Workshops: BD Alaris™ System and BD Pyxis™ Technologies

BD Medication Data Workshops provide advanced education to help hospital pharmacists, nurses, risk managers and quality officers realize the full potential of their medication management system.

Data workshops are offered as up to 3-day seminars hosted in various geographical locations throughout the calendar year and can help your team improve processes and performance across your healthcare system. Develop the following competencies in the 3-day workshop:

BD Alaris™ System (day 1 and 2)

Registration for day 1 and day 2 BD Alaris™ System at www.bdworkshops.com

- Prioritize and develop performance improvement projects to help increase safety and economic savings
- Apply key trends to better manage drug libraries and stay abreast of industry topics
- Establish methods to enhance patient safety using potential adverse drug event data
- Become familiar with logistical and clinical takeaways from the key performance indicators (KPI)

BD Pyxis™ Technologies (day 3)

Registration for day 3 BD Pyxis™ at www.bd.com/LearningCompass

- Define and interpret KPIs to optimize inventory management
- Use PAR level adjustments to drive process improvements
- Recognize data anomalies through ongoing monitoring of controlled substance inventory changes and overrides
- Perform system maintenance tasks related to cost file upload, threshold maintenance, as well as medical and station filters
- Access, customize and schedule reports

Workshop	Day 1 and 2	Day 3	Cost for additional participant or without contract
BD Alaris™ System	Two seats included with SMS3		\$1,000
BD Pyxis™ Technologies		Two seats included annually with Premier Service & Support	\$500

Planning your trip

You are responsible for your hotel reservations, travel plans, on-your-own meals and incidentals. BD does not reimburse these expenses.

Tuesday–Thursday, November 9–11, 2021	Atlanta, GA	Loudermilk Conference Center 40 Courtland Steet NE Atlanta, GA 30303

“I really enjoyed the combined workshop! It was incredibly helpful for both infusion and med data, as I am (was) very inexperienced with Knowledge Portal analytics. I think the combination workshop was very well done—good balance and pace, very engaging/smart presenters and good engagement from and interaction among the attendees.”

Casey Erdrich, Pharmacy Compliance Officer, Providence Alaska Medical Center

Recommended workshop preparation

- Data users establish access to the BD Integrated Analytics™ Knowledge Portal for infusion technologies and/or Knowledge Portal for BD Pyxis medication technologies.
- Generate recommended reports to use in the workshop
- Attend recommended webinars provided at www.bd.com/LearningCompass
